

HyangSu Shin

Cornwall, ON | (613)-551-4873

hyangsu.shin@student.sl.on.ca | <https://hyangsushin.github.io>

Summary of Qualifications

- Experience with programming languages, including C++, C#, Python, HTML, CSS, and JavaScript.
- Experience with game engines, including Unity, and Phaser.
- Experience with project environments using GitHub, JIRA, Confluence and Jenkins
- Experience with graphics and networking.
- Strong problem-solving and math skills.
- Understanding object-oriented programming, data structures, and design patterns

Education

Game Programming Diploma | St. Lawrence College | Cornwall, ON 2023
cumulative GPA 3.997

Mechanical System Design Engineering | SeoulTech | Seoul, Korea 2015

Projects

- **Color Jumper** - Collaborated with a team of 5 to create a 2D platformer game using Unity; Programmed the boss AI, saving system, and game UI (Menu, Pause, HUD, Level Map). Used GitHub, JIRA, CONFLUENCE, and Jenkins.
- **Super Soy Boy** - Created a 2D platformer game using Unity; Created level design and Saving system; Programmed the movement of player and obstacles, and the game UI.
- **Robot Rampage** - Created a 3D FPS game using Unity; Programmed the player, robots (enemy AI), Collectables and game UI.
- **Bobblehead War** - Created a 3D Shooting game using Unity; Programmed the player, spiders (enemy AI), and victory event (elevator operation).
- **Password Generator** - Created a password generator that requires the user to take a quiz using C++ (GUI); Programmed to generate a password after the user inputs the number of letters, numbers, and symbols and takes a quiz.
- **Jumping up Game** - Created a 2D platform game using Phaser; Programmed player and platform motions, speed of game, game UI (score, menu, pause)
- **Frogger Game** - Created a 2D arcade action game using C++ (SDL); Programmed Main Menu, Game, Option and Method Scene

Work Experience

Crew member | *Tim Hortons* | Cornwall, ON 2022-Present

- Provided support as quickly as possible to other team members to maintain a fast pace.
- Assisted customers daily, greeting them, and providing information on procedures.

Mechanical Designer | *Doolim Yaskawa* | Anyang, Korea 2018-2021

- Designed the entire factory layout based on robot movement and paint flow with AutoCAD.
- Verified the safety of the structure using simulation with SOLIDWORKS.
- Established and maintained part number management system for quality assurance.

Production Management Intern | *Electro-Tech Services, Inc* | TX, USA 2016-2017

- Utilized communication and collaboration skills to meet daily production levels.
- Recommended swapping completely failed boards with new ones to maintain production.
- Recorded inventory using excel for part purchase request.

Mechanical Engineer Intern | *Honeywell* | Seoul, Korea 2015-2016

- Managed the development process, including approval, ordering, sampling, and verification.
- Prepared design documents for patent applications by verifying existing patent data.
- Negotiated with partner companies for gas detector development.
